Welcome Omar Essam Eldin from Web Application Technologies and Django

Autograder Django Tutorial 01

Assignment instructions:

https://www.dj4e.com/assn/dj4e_install52.md (../assn/dj4e_install52.md?PHPSESSID=8fa5906fa9a3fa2200961bb6fd55ec07)

To receive a grade for this assignment, include this string **69459307** on the pages of your application.

Here is a sample of what you might put into your **views.py**.

```
return HttpResponse("Hello, world. 69459307 You're at the polls index.")
```

Also you will need to edit the file **mysite/mysite/settings.py** and edit the **ALLOWED_HOSTS** to look as follows:

```
ALLOWED_HOSTS = [ '*' ]
```

Please enter the URL of your web site to grade:

Evaluate

By entering a URL in this field and submitting it for grading, you are representing that this is your own work. Do not submit someone else's web site for grading.

You can run this autograder as many times as you like and the highest grade will be recorded. Make sure to double-check the course Gradebook to verify that your grade has been sent.
